

WEDGE NDP-2080T

Wedge Networks'™ NDP-2080T is the world's first 10 gbps throughput Deep Content Inspection appliance, purpose-built for the performance and accuracy requirements demanded by large enterprises, ISP's, Fixed Line and Mobile Operators, and high bandwidth organizations.

As a multi-gigabit Deep Content Inspection appliance, the Wedge NDP-2080T can be easily deployed into any network to transparently enforce Deep Content security policies such as blocking infected traffic at wire line speeds. It is a purpose built appliance for protecting web surfing PCs, laptops and smartphones from infections, for defending web and application servers against malicious attacks, and for enforcing company policies while not impacting the end user perception of internet performance and reliability.

Setting The New Standard For High Bandwidth Security

The Wedge NDP - 2080T was built from the ground up with a focus on catering to those high bandwidth users for which other solutions are unable to protect. Based on Wedge Networks'™ award winning WedgeOS™ Deep Content Inspection platform, this hardware / software combination provides the next generation of Network Based Deep Content Inspection solutions. It incorporates the best of breed content security techniques to protect the network by inspecting commonly used application layer protocols, such as HTTP, SMTP, POP3, IMAP and FTP, effectively eliminating threats before they reach network endpoints (servers, desktops and mobile devices).

Integration

Fully Integrated for use with the many Cloud Network Defense™ Security Suite services such as APT/Anti-Malware, Anti-Spam/Anti-Spear Phishing, DLP, Mobile Security, Next Generation Content Filtering, Application Control, etc. to allow dedicated security policies to be deployed across the web and email with a single appliance.

Built for performance with the SubSonic Engine's™ unique traffic handling, the resource needs for anti-malware defense are easily administered while allowing room for organizations to grow and add additional protection services without altering user experience.

Seamless network integration with the ability to deploy as a transparent inline bridge, the Wedge Content Security appliances can be deployed into your network with no need for costly and disruptive network outages and reconfigurations. In addition, other deployment modes such as WCCP, ICAP, etc. allow for maximum flexibility.

Specifications

NDP-2080T

Performance

Email (messages per hour)	6,000,000+
HTTP (requests per hour)	Up to 15,000,000
Concurrent Users	50,000+

(actual number of users is much higher depending on network characteristics)

Hardware

CPU	2 x 10 Core Intel® Haswell® E5-2650 v3 (25MB Cache, 2.30 GHz)
RAM	8 DIMS x 8GB RAM - ECC DDR4-1600 (Up to 384 GB)
Storage	1 x 1.6TB SSD
Network Ports	4 x 1GbECopper + 4 x 10GbE SFP+
Power Supply	800W 2U 1 + 1 Redundant Power (hot swappable) AC 100~240VAC
Command Console	Dedicated iLO Connector and COM (RJ-45)
Peripheral Ports	USB 2.0 x 2 + VGA, USB 3.0 x 1 (Front) and 2 (Rear)

Physical/Operational

Form Factor	2U Rack mount
Width, Depth and Height	17.54" x 26.75" x 3.44"
Weight	40 lbs
Operating Temperatures	0°C to 40°C
Storage Temperatures	-30°C to 60°C
Relative Humidity	8% to 85%
Power Consumption (W)	800W
Certifications	CE, FCC, RoHS, UL, CCC

Functions Available on the Cloud Network Defense™ Security Suite

APT/Malware Defense combines real-time sandboxing with the broadest threat intelligence and Deep Content Inspection (DCI) to secure against all malware attacks, persistent threats, network abuse, and blended attacks across all networked devices.

Anti-Spam/Anti-Spear Phishing combines real-time intelligence of over 2 billion sensors worldwide with behavioural analysis and DCI to secure against all messaging threats; rapidly deploying into even the most complex of networks with transparent (non-MTA), two-way protection.

Data Loss Prevention detects and prevents the leakage of structured and unstructured data, effectively stopping confidential data escaping via web and email.

Mobile Security enables the secure usage of mobile devices, solving the phishing, malware, network abuse, blended attacks and data security within your network or while roaming.

Next Generation Content Filtering uses the largest web classification database with the most comprehensive categories, augmented with human reviews, producing industry-best accuracy. This enables organizations to understand, filter, monitor and report on Internet usage, allowing employees to take full advantage of the Web without compromising business goals.

Application Control combines real-time network Flow security with the broadest threat intelligence and DCI to enable the detection and blocking of traffic that are detrimental to an organization's productivity and image.

Unequaled Performance

The NDP-2080T allows Carriers, Telecom Companies and Internet Service Providers to add an extra layer of protection for all of its users, providing the accuracy and performance needed in high bandwidth environments.

Wedge Networks™, Inc.

is revolutionizing real-time network security with cutting edge innovation, performance, and scale. Embracing global innovation, Wedge's Cloud Network Defense™ (WedgeCND™) and Absolute Real-Time Protection (WedgeARP™) Series of products integrate and orchestrate the industry's highest performance security inspection and mediation engines with best-in-class security technologies developed by Wedge and third parties. Purpose-built as fully virtualized security systems, these products can be deployed in the form of x86 appliances, virtual machines, or cloud application software. Today, these industry-leading solutions block security threats for tens of millions of end users in enterprise, service provider, government agency, and security-as-a-service networks spanning more than 17 countries.

Wedge Networks is headquartered in Calgary, Canada with international offices in Dallas, USA; and Manama, Bahrain.

Wedge Instant-On Program

The Wedge VM™ is available for free trial through the Wedge Instant-On program. The free evaluation comes with 45-day trial license for all services.

Our extensive Product Evaluation Programs allow you to experience the Wedge Content Security platform as part of your decision process.
